

REBA-Wachstrennmittel

Universally Applicable Wax Emulsion

Product Information:

Properties:

REBA-Wachstrennmittel forms a wax film on the shuttering with a high separating effect producing particularly even surfaces free of blow holes. The concrete does not suffer any discolouration and gets sharp edges and profiles.

Application:

Using **REBA-Wachstrennmittel** in the production of upright wall units the concrete does not rub off the separating agent from the shuttering mould. **REBA-Wachstrennmittel** is a separating agent for all types of shutterings.

Using **REBA-Wachstrennmittel** the steel reinforcements which have to be bended off the shuttering level after release do not combine with the surrounding concrete.

Notes on processing:

REBA-Wachstrennmittel is applied to the shuttering undiluted with a soft cloth or sponge as thin and homogeneous as possible. The shuttering should be dry and clean to provide for the entire effect of the formed film.

Quantities to Use:

depending on the type of shuttering: 20 – 60 g/m²

Specifications:

Colour: beige

Storage: Protect against frost and contamination. Under normal storage conditions (closed container, 20 °C) minimum shelf-life approx. 12 months.

Supplied in:	container	approx. 1,000 l
	drum	210 l
	can	20 l

Safety Rules:

See EC Safety Data Sheet.
